DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 102, 132 and 133 are rejected under 35 U.S.C. 102(b) as being anticipated by Warner et al (WO99/05255, hereinafter Warner).

Claim 102 - applicant's attention is invited to claims 1-4. A glycolipid is set forth in claim 4 and the embryo is transferred into a recipient mother, uterus, page 22 line 30. Survival rate is enhanced as shown on page 5 lines 25-30

Claim 132 - human use is set forth on page 20 lines 32-44.

Claim 133 - page 17, lines 1-8 set forth use for a mouse embryo, the examiner is considering the mouse a species.

Allowable Subject Matter

Claims 103-131 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or fairly suggest exogenous modified glycolipid modified to incorporate a binding part and an attachment molecule capable of binding through a binding molecule as set forth in claim 103.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 6,309,843 teaches a glycoprotein for endometrial use.
